

CASA0029 Urban Data Visualisation 2025/2026
Group Project Assessment

Group Project Theme 2025-26: Urban Analytics
“Pathways to Progress”

Team Members

Tee Chin Min Benjamin	benjamin.tee.25@ucl.ac.uk	25049107
Tabata Paredes Condor	ucfnjtp@ucl.ac.uk	25153376
Yujing (Olivia) Xing	yujing.xing.20@ucl.ac.uk	20179043

Project Output Table

Project Output	Output Description
Project Output Files	Zip File Submitted on Moodle
Project Website	https://benjamintee.github.io/CASA_UDV_Final/pathways_to_progress.html
Project Methodology Summary	The project methodology is summarised on the Github repository page – link here

AI Use and Contribution Statement

AI Use Classification:

- Substantive — AI use shaped output
- Consulted — AI used to debug, advise, or refine existing work
- No AI use

Note: AI tools were used to assist with coding, debugging, and drafting. All analytical decisions, research framing, and interpretations were made by the project team.

Task	Major Contributors	Additional Contributors	AI Use	AI Tool and Nature of Use
Project Concept Development	All team members		—	<i>No AI use</i>
Project Hosting Structure (GitHub Pages)	Benjamin		—	<i>No AI use</i>
Narrative and Project Scoping	All team members		○ Consulted	ChatGPT used to refine key narrative points and section framing
Secondary School Database	Benjamin		—	<i>No AI use</i>
Research: Secondary School Admissions Criteria	Tabata		—	<i>No AI use</i>
Research: Travel to School Trends	Olivia	Benjamin	—	<i>No AI use</i>
Travel Time Matrix in R5PY	Benjamin, Olivia		○ Consulted	Claude consulted to refine Python code for R5PY routing and optimal computing
Isochrone Analysis in R5PY	Benjamin		○ Consulted	Claude consulted to structure R5PY code for isochrone generation
Bivariate LISA Cluster Analysis	Olivia	Tabata	○ Consulted	Claude consulted to debug implementation, fix index alignment, and refine quadrant labelling
Spatial Layers & Tippecanoe Processing	Benjamin		○ Consulted	Claude consulted to diagnose tile gap issues and determine correct Tippecanoe flags (--no-simplification, --no-feature-limit)
Webpage Layout, Scroll Story & Step Structure	Benjamin	Tabata	○ Consulted	Claude consulted to refine webpage sections and set up scroll step architecture
Colour Themes and Chart Aesthetic	Tabata	Benjamin	○ Consulted	Gemini consulted to refine colour palette for deprivation section to improve contrast
Visualisation 1 (Motivation) – Isochrones	Benjamin		○ Consulted	Claude consulted to structure R5PY isochrone code
Visualisation 2 (Travel) – Charts	Olivia, Benjamin		—	<i>No AI use</i>
Visualisation 3A (Access) – Comparison & Violin Plot	Tabata, Benjamin		● Substantive	Claude used to develop comparison map, clip-path slider logic, and violin plot rendering
Visualisation 3B (Access) – Borough-Level Summary	Benjamin	Tabata	● Substantive	Claude used to build hover overlay, borough chart, and map-chart click synchronisation

Task	Major Contributors	Additional Contributors	AI Use	AI Tool and Nature of Use
Visualisation 4A (Vulnerability) – Cluster Visualisation	Olivia, Benjamin		● Substantive	Claude used to develop LISA explorer, brick chart, stat panels, cluster button toggle and map highlight sync
Visualisation 4B (Vulnerability) – Borough Summary	Benjamin	Tabata	○ Consulted	Claude consulted to build borough bar chart, hover overlay, and bidirectional map–chart synchronisation
Landing Page – Network Map	Benjamin	Tabata	○ Consulted	Gemini consulted to explore visual concepts; Claude consulted on Mapbox glow layer implementation
Interactivity & Visualisation Functionality	Benjamin	Tabata	○ Consulted	Claude consulted to troubleshoot scroll engine conflicts, step action sequencing, mode switching, and fix observer bugs
